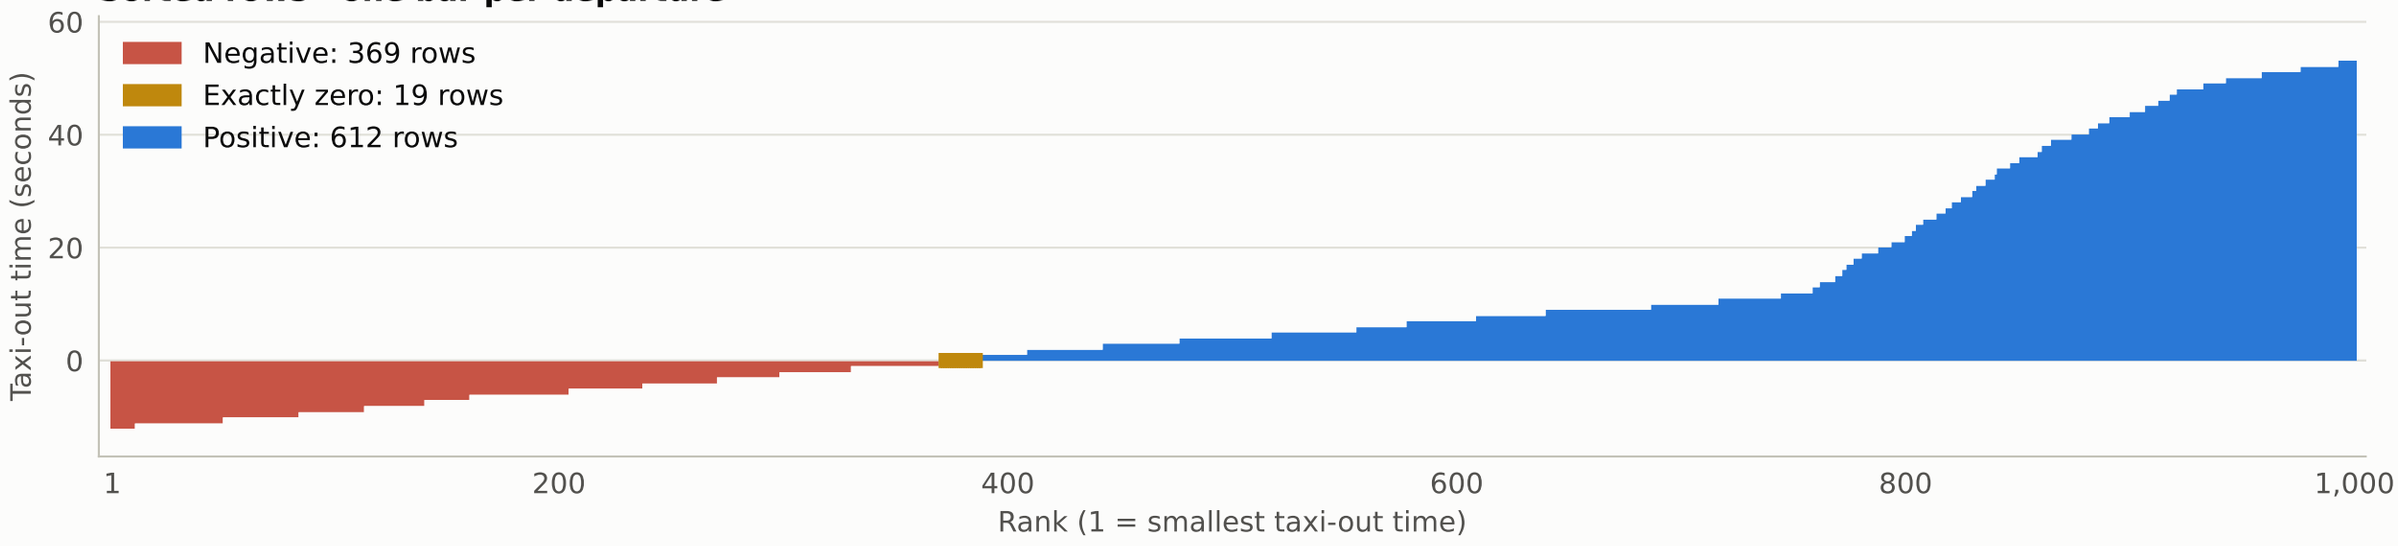
The 1,000 shortest taxi-outs

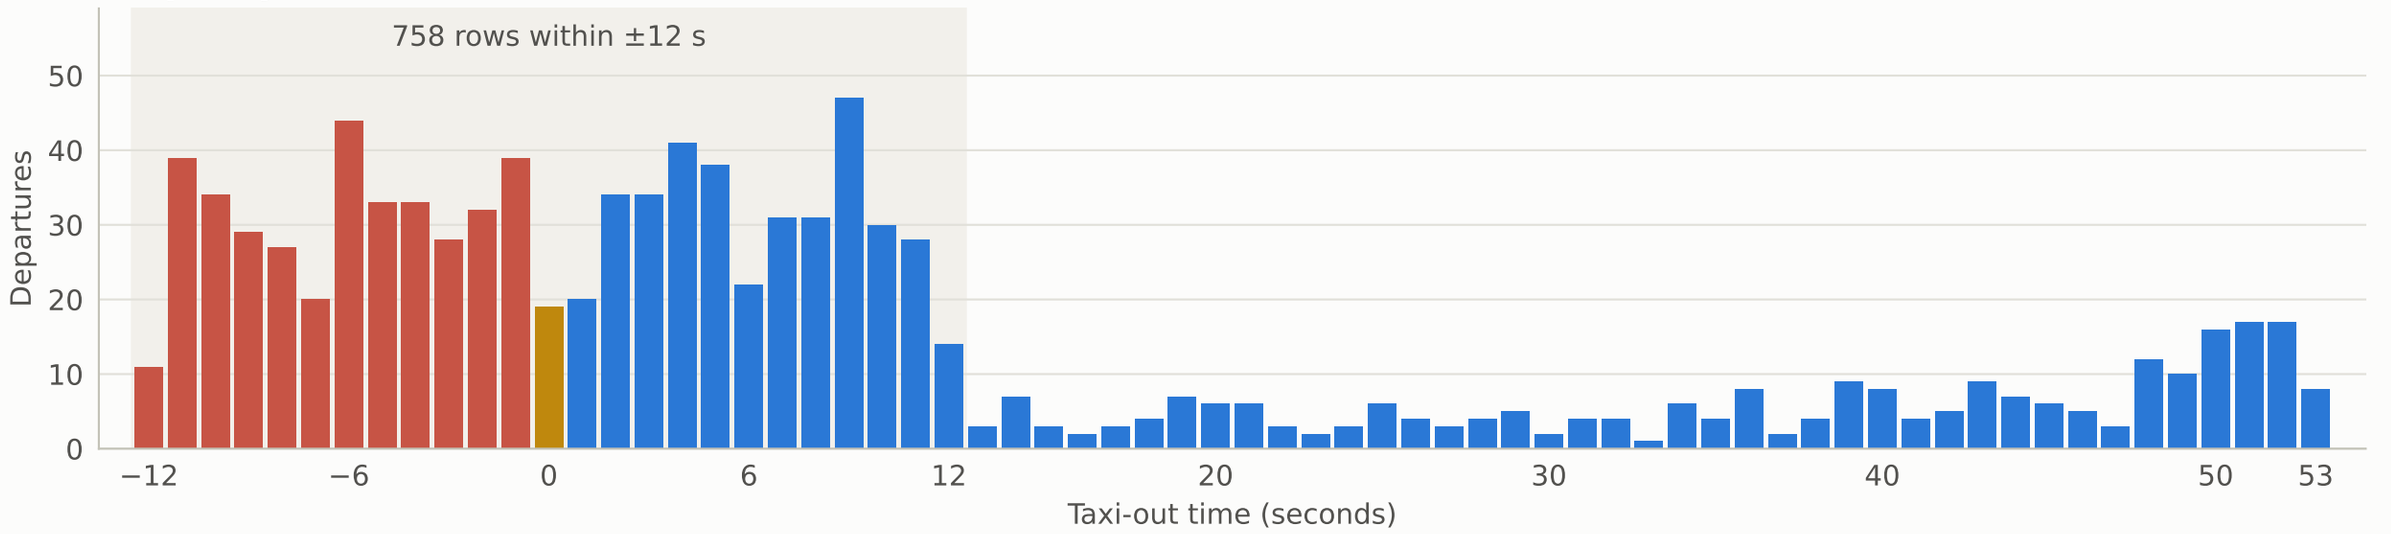
All 2025 training departures · zeros and negatives retained

Range: -12 to 53 seconds · 758 of 1,000 rows are between −12 and +12 seconds

Sorted rows · one bar per departure



Frequency at each exact second · same 1,000 rows



Source: 12 original training parquets · PHASE_mvt = DEP · no target-value filter

Zero-height rows are marked on the upper baseline. Ties are ordered by movement ID; the last second may be only partly included.
